

Back on Track

A Comprehensive Short-Term Evaluation
Coordinated by Stevens Treatment Programs

We Have a Solution

Frustrated by a case with too many unknowns? Not enough time or resources to coordinate a comprehensive evaluation?

Let Stevens Treatment Programs provide your client the attention they deserve with a short-term evaluation culminating in an action plan to get your client *Back on Track*.

How We Can Help

Choose from the following expert assessments:

- **Functional Behavioral Analysis**
- **Educational Needs**
- **Clinical Profile**
- **Medical Assessment**
- **Risk Assessment**
- **Family Assessment**

Depending on client needs, these assessments are completed in 45 to 60 days. Once we have completed the evaluation, our team will present you with a comprehensive written report and will work with you to develop a plan for community-based services or placement options. The *Back On Track* evaluation lets you make an informed decision and directs your client toward the most appropriate services.

Expert Analysis

We surround your client with experts in every field to ensure an in-depth and accurate assessment so you can be confident when planning for the next steps. Our state-of-the-art facility ensures your client's comfort and safety, as the setting eliminates distractions and encourages the adolescent to focus on his issues.

Smooth Transition

When considering admission, we can screen your client at our location, over the phone, or at a location you specify. Once the evaluation begins, our teaching staff will coordinate lesson plans and maintain a portfolio of the client's work to ensure a smooth re-entry into academic life. We will also work with follow-up providers to ensure they have the necessary information and a complete understanding of your client's needs.

Effective Action Plan

We give you an action plan your client can start with right away. With well-defined goals, your client can take steps towards real, lasting progress and independence, getting them *Back On Track*.

A Profile of the Stevens Diagnostic Assessment

- Family Assessments include family problem list and family strengths
- Client Assessments focus on the ability to apply strengths to effectively utilize individual, group and family therapy services
- Medical and Psychiatric services assess the need for medical intervention or additional evaluative testing
- Educational Assessments produce a description of learning styles, student strengths and academic ability
- Functional Behavioral Assessments identify common behavioral problems, the level of aggressive actions, social skills and the quality of relationships
- Evaluative Reports include offender and fire-starter evaluations, substance-abuse screening, psychological and psychiatric testing
- The Assessment Program culminates in a diagnostic formulation that focuses on the level of functioning of the client and his family
- Recommendations for further intervention are made by the diagnostic team
